

PHYSICAL THERAPY — INITIAL EVALUATION

PATIENT Dax Vance	DOB 04/12/2001	MRN 940-2281-A	DATE OF SERVICE 09/15/2023
----------------------	-------------------	-------------------	-------------------------------

REFERRING DIAGNOSIS	Post-surgical left humerus and radius ORIF, cervicgia, left knee contusion
PAIN REPORT	8

RANGE OF MOTION		
JOINT / MOTION	MEASURED	NORMAL
Left Elbow Flexion	45	140
Left Wrist Extension	10	60
Cervical Rotation (Left)	20	80

STRENGTH (MMT)	
MUSCLE GROUP	GRADE
Left Elbow Flexors	2/5
Left Wrist Extensors	2/5

FUNCTIONAL STATUS	
Gait	Antalgic, device as noted
ADLs	Modified independence, limited by pain
Work	Off full duty — restrictions per surgeon

PLAN OF CARE

Initiate therapeutic exercises, passive/active-assisted range of motion, hot/cold pack therapy 3 times per week for 12 weeks.

Robert Stewart

Robert Stewart, PT, DPT — Physical Therapy

NPI 1332021198 · Signed 09/15/2023

PHYSICAL THERAPY — DAILY TREATMENT NOTE VISIT 1

PATIENT Dax Vance	DOB 04/12/2001	MRN 940-2281-A	DATE OF SERVICE 09/18/2023
----------------------	-------------------	-------------------	-------------------------------

PAIN (0-10)	8/10	TOLERANCE	Fair — required rest breaks
SESSION FOCUS	Gentle active-assisted elbow flexion and extension. Cold packs applied to left arm for swelling.		

INTERVENTION	CPT	MINUTES	SETS/REPS
Therapeutic exercise — progressive program per plan of care	97110	30	3 × 10-12
Manual therapy — joint/soft tissue mobilization	97140	15	—
Home exercise program review and progression	—	5	—

Assessment: Patient progressing toward plan-of-care goals; continue current progression.

ATTENDANCE RECORD — MISSED APPOINTMENTS

PATIENT	DOB	MRN	DATE OF SERVICE
Dax Vance	04/12/2001	940-2281-A	09/18/2023

SCHEDULED DATE	STATUS	CONTACT ATTEMPT
11/14/2023	NO SHOW	Voicemail left; reschedule offered
11/17/2023	NO SHOW	Voicemail left; reschedule offered
11/21/2023	NO SHOW	Voicemail left; reschedule offered — no response

Patient did not attend the above scheduled visits and did not respond to two of four outreach attempts. Upon return on 11/27/2023, patient attributed the lapse to holiday season workload and transportation logistics. Treating therapist counseled the patient that interruption of the strengthening phase results in measurable regression and extends the projected plan of care.

PHYSICAL THERAPY — DISCHARGE SUMMARY

PATIENT Dax Vance	DOB 04/12/2001	MRN 940-2281-A	DATE OF SERVICE 12/11/2023
----------------------	-------------------	-------------------	-------------------------------

SUMMARY OF CARE

Patient Dax Vance completed 30 sessions of physical therapy. Showed initial progress in left upper extremity range of motion, but progress was hindered by a 2-week period of non-attendance in mid-November. Severe cervical stiffness and localized left arm pain persist. Patient requested transition of care to Emory Sports Medicine Complex for advanced athletic rehabilitation. Discharge from our service.
