

PHYSICAL THERAPY — INITIAL EVALUATION

PATIENT Dax Vance	DOB 04/12/2001	MRN 940-2281-A	DATE OF SERVICE 01/08/2024
----------------------	-------------------	-------------------	-------------------------------

REFERRING DIAGNOSIS	Post-surgical left humerus/radius ORIF with persistent muscle wasting, chronic cervical disc bulge
PAIN REPORT	6

RANGE OF MOTION		
JOINT / MOTION	MEASURED	NORMAL
Left Elbow Flexion	110	140
Left Wrist Extension	35	60
Cervical Rotation (Left)	45	80

STRENGTH (MMT)	
MUSCLE GROUP	GRADE
Left Elbow Flexors	3+/5
Left Wrist Extensors	3/5

FUNCTIONAL STATUS	
Gait	Antalgic, device as noted
ADLs	Modified independence, limited by pain
Work	Off full duty — restrictions per surgeon

PLAN OF CARE

Initiate progressive resistance strengthening, advanced neuromuscular re-education, myofascial release, and thermal therapies 3 times per week for 10 weeks.

Dax Vance	04/12/2001	940-2281-A	03/25/2024

SUMMARY OF CARE

Patient Dax Vance completed 30 sessions of intensive rehabilitation. He achieved substantial improvements in left arm strength and coordination. However, patient continues to demonstrate a persistent 15-degree extension deficit in the left elbow and marked sensory blunting over the radial hand. Chronic neck pain is reported at a baseline of 3/10. Patient has achieved Maximum Medical Improvement (MMI). Discharged.
